Attorney Docket No.: FUK-59
Amendment Dated: December 5, 2005
Reply for Office Action Dated: 3 June 2005

AMENDMENTS TO THE SPECIFICATION

Please replace the first full paragraph at Page 19 of the substitute specification filed 13 May 2002 with the following amended paragraph:

The group of auxiliary fine pores shown in Fig. 3B are provided on a surface of the floating unit 301 at positions on a circle with a radius of 40 mm in the outer side from a center of the floating unit 301 at an angular space of 90 degrees and are inclined to a center of the floating unit 301. However, a radius of the circle on which the fine pores 310e constituting the group of auxiliary fine pores is not always limited to 40 mm, and may be set to any value on the condition that the circuit is positioned in the outer side from a radius of the circuit on which the fine pores for rotation are provided. Also in Fig. [[3D]] 3B, fine pores constituting a group of auxiliary fine pores are provided at an angular space of 90 degrees, but this angle may be set to an appropriate value.
